

Features & Benefits

The *Tag Suggester for SharePoint* automatically offers a set of appropriate content-based keyword suggestions, depending on managed metadata, associated tag rules, store context, item and document properties, metadata information and textual document contents. By default SharePoint 2010 offers a tag search feature with auto-complete function only:

- Increased productivity and precision while tagging SharePoint items and documents manually. The system is not only able to suggest many useful tags, but also to discover new and relevant tags, not suggested by any of the human users.
- A suggest list is displayed to select from appropriate tags / keywords based on assigned term sets.
- The taxonomy entry point (root node) is automatically chosen with respect to the current managed meta data column settings.
- List items are processed as well as documents and files located in SharePoint libraries.
- Installed IFilters are used for content analysis, e.g. for Word, Excel, PowerPoint, PDF and many more.
- Use of categorization rules is supported (e.g. one term is in document content while another term is not). High quality of subject classification using a high performance Microsoft .NET Framework based rule engine.
- 100% SharePoint 2010 technology: The solution is completely based on the new Microsoft SharePoint Enterprise Metadata Management API. No MOSS 2007 legacy code or external 3rd party tools.
- Open API: Optionally plug-in of existing 3rd party solutions for text-mining, rule generation etc.
- You may also tag any external data sources to use with the SharePoint Knowledge Management and Social Networking features with the help of the Business Data List Connector for SharePoint.

Licensing & Partner Program

- **FREE shareware version available on web site:** Just register, download and use.
- Licensed as part of the Knowledge Management Suite for SharePoint 2010 only: US\$ 1,899 / 1499 € for entire suite per server (WFE and App. Server).
- Annual Software Assurance: 20% per year.
- Add-ons: Available, see web site.
- Partner Program: Cost-free, 30% discount on licenses, FREE NFR versions, lead transfer, priority support, joint development.
