

### Features & Benefits

The Knowledge Management Suite for SharePoint 2010 makes it as easy as possible to manage taxonomies, to tag content using terms and to use tags for knowledge browsing, navigation, content discovery and search:

- **100% based on the new SharePoint 2010 Server Enterprise Metadata Management API:** The product has been awarded "Microsoft Platform Ready for SharePoint 2010".
- **Taxonomy Manager:** Advanced features to manage the SharePoint Term Store including import, export, update and deployment. Support for several formats including SKOS. Additional managed metadata properties (e.g. tagging rules). Full taxonomy life-cycle management to develop, enhance and maintain SharePoint term sets.
- **Tag Suggester:** While tagging items or documents, display a tag suggestion list based on given Term Sets (taxonomies), tagging rules, item properties, context and document *content*.
- **Auto Tagger:** Tags items and documents automatically in background without any user interaction, based on given Term Sets (taxonomies), tagging rules, item properties, context and *document content*. High quality of subject classification using a high performance Microsoft .NET Framework based rule engine. Installed IFilters are used. Auto Tagger could be helpful for initial tagging, e.g. after content migration from any system to SharePoint 2010, as well as for daily background operation.
- **Tag Navigation Web Part:** Harvest the value of collaborative tagging by using the SharePoint managed metadata taxonomy tree directly for content discovery and navigation. Flexible link building, e.g. link to Tag Profile page or tag search result list. Optionally displays additional information, e.g. tag description and usage count. Template-based design.

**"Microsoft Partners can plug the taxonomy gaps of SharePoint."**

Leslie Owens, Forrester Research

### More Features & Benefits

- **Tag Directory Web Part:** Renders the SharePoint managed metadata taxonomy tree as flat A-Z term directory index for content discovery and navigation, e.g. as glossary. Flexible link building, e.g. to the Tag Profile Page or tag search result list. Optionally displays additional information, e.g. tag description and usage count. XSLT template-based design.
- **Tag Cloud Web Part:** Navigate the content by its importance using a familiar taxonomy-based tag cloud.
- **Related Content Web Part:** Automatically displays related content in a given context using managed metadata based tagging.
- **Additionally available:** Ready-to-use taxonomies for SharePoint 2001.
- **Additionally available:** Full managed metadata support for almost any *external* data sources.

### Licensing & Partner Program

- **FREE** shareware version available on web site: Just register, download and use.
- Server license: US\$ 1,899 / 1499 € per server
- **Optional:** Annual Software Assurance: 20% per year.
- **Partner Program:** Cost-free, 30% discount, FREE NFR versions, priority support, lead transfer, joint development.
