

Features & Benefits

The Cloud Connector for Microsoft SharePoint 2010 and Office 365 connects your local corporate line-of-business data to your cloud-based SharePoint:

- Extends the SharePoint cloud capabilities to existing data sets, that will continue to reside within your corporate network – directly connected to *native* SharePoint lists in the cloud and always up-to-date.
- No programming or tools required. Setup in a few minutes guided by a wizard. No installation or customizing in the SharePoint cloud required.
- Compatible to *ALL* SharePoint 2010 offerings: On premise, any hosted, Office 365, sandboxed etc.
- 100% Microsoft SharePoint 2010 compatible – utilizes the new Microsoft Client Side Object Model CSOM API model for the cloud.
- Secure data connection and transfer: A connection is established only for data exchange – not for general list usage. No direct access to corporate data required from outside. The connector runs where your data resides today - on any server or client inside your corporate network with Internet connectivity per http / https available.
- Almost any data source supported: ODBC, OLEDB, .NET-based providers, files (Excel, XML, CSV), SQL Server, Oracle, MySQL, IBM DB2, IBM AS/400, IBM Informix, Microsoft SharePoint, Exchange, Active Directory, Navision, Lotus Notes, SAP etc.
- More complex data sources, e.g. web services, custom COM or .NET objects, can be connected using 3rd party add-ons.
- Start workflows or send email notifications in the cloud on data change in your corporate LOB data.
- Add additional “cloud-only” columns, e.g. for ranking, rating, comments or file attachments.
- Years of experience: The connector is based on another very successful product, the Business Data List Connector for SharePoint 2007 and 2010.

“A data-integration strategy needs to be within the foundation of your cloud computing plan. This integration needs to be innate to the architecture; it can't be something you're reminded of at the rollout meeting...”

David Linthicum in *Cloud Computing*

Licensing & Partner Program

- FREE shareware version available on web site: Just register, download and use.
- Professional license for small and medium enterprises: USD 1,407 / 995 € per server.
- Enterprise license on request.
- Annual Software Assurance: 20% per year.
- Partner Program: 30% discount on licenses, FREE NFR versions, priority support, joint development.
